1 Introduction

Here are the 3 instances for each class :

- Outdoor_furnitures
 - ♡ plastic_table
 - ♡ plastic_chair
 - ♡ sunshade
- Inside_furnitures
 - ♡ bed
 - ♡ carpet
 - ♡ armchair

After loading in Protégé, the classes are in the right order, but even after reasoning, the instances don't go to the right classes. But when I query with Yasgui on my local fuseki server, the instances are right classified. Here is the Protégé's screen-shot.
